

Layout Option:

Header	
Video/Image 1	Image 2 Text
Button 1	Button 4
Button 2	Button 5
Button 3	Button 6
Footer	

Max Dimension Recommendations:

HEADER	900w x 125h (pixels) (Supported File Types: png, jpeg, jpg, gif)
VIDEO/IMAGE1	350w x 300h (pixels) (Supported File Types: mpg, flv, wmv, mp4, png, jpeg, jpg, gif)
IMAGE2	350w x 300h (pixels) (Supported File Types: png, jpeg, jpg, gif)
FOOTER	900w x 75h (pixels) (Supported File Types: png, jpeg, jpg, gif)

Key Points:

- Keep the width of the **HEADER** and **FOOTER** the same
- If **IMAGE2** is as large as the suggested pixel size, it will push the text and the buttons farther down the page. As small as 198w x 192h is plenty depending on layout goal.
- There is always the option to leave out any of these graphics, though it is suggested that there is at least a **HEADER** and **FOOTER**.
- If there is an **IMAGE2**, **TEXT** can be about 320 characters.
- Without an **IMAGE2**, **TEXT** can be about 1,000 characters
- If using a **VIDEO**, you may not have an **IMAGE1**
